Strahlenschutzblech
Heat protection panel
Panneau de protection thermique
Bescherming tegen hitte panel

There is a fire risk if the heat protection panel is not fitted!

Even with the heat protection panel installed, the surfaces in the wood storage rack will reach temperatures of approx. 80°C! Use caution when touching hot surfaces!

Sans panneau de protection thermique, il existe un risque d'incendie!

Même avec le panneau de protection thermique, les surfaces de l'étagère à bois peuvent chauffer jusqu'à 80°C env. Attention lors du contact avec les surfaces très chaudes!

Zonder het bescherming tegen hitte panel bestaat brandgevaar!

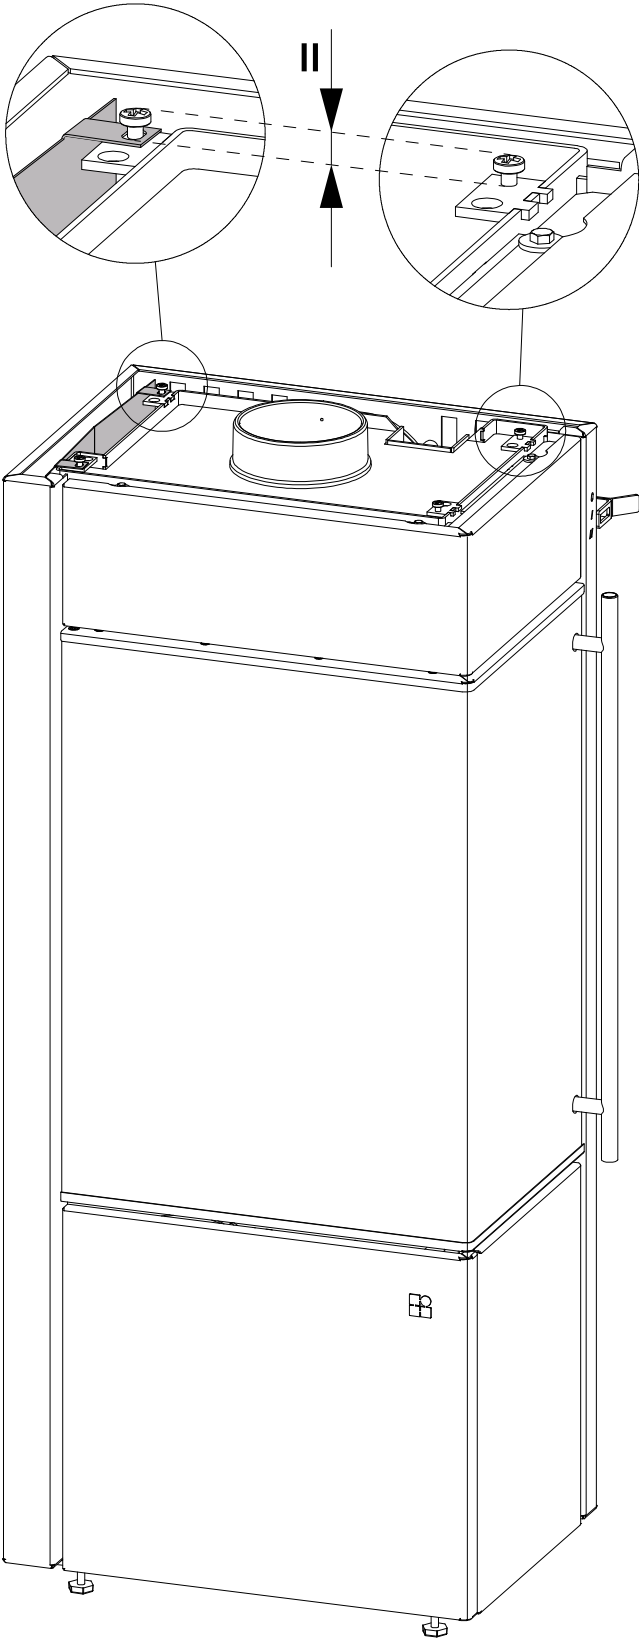

Ook met het bescherming tegen hitte panel loopt de temperatuur van de oppervlakken in de houtstelling op tot ca. 80 °C! Voorzichtig bij aanraken van hete oppervlakken!

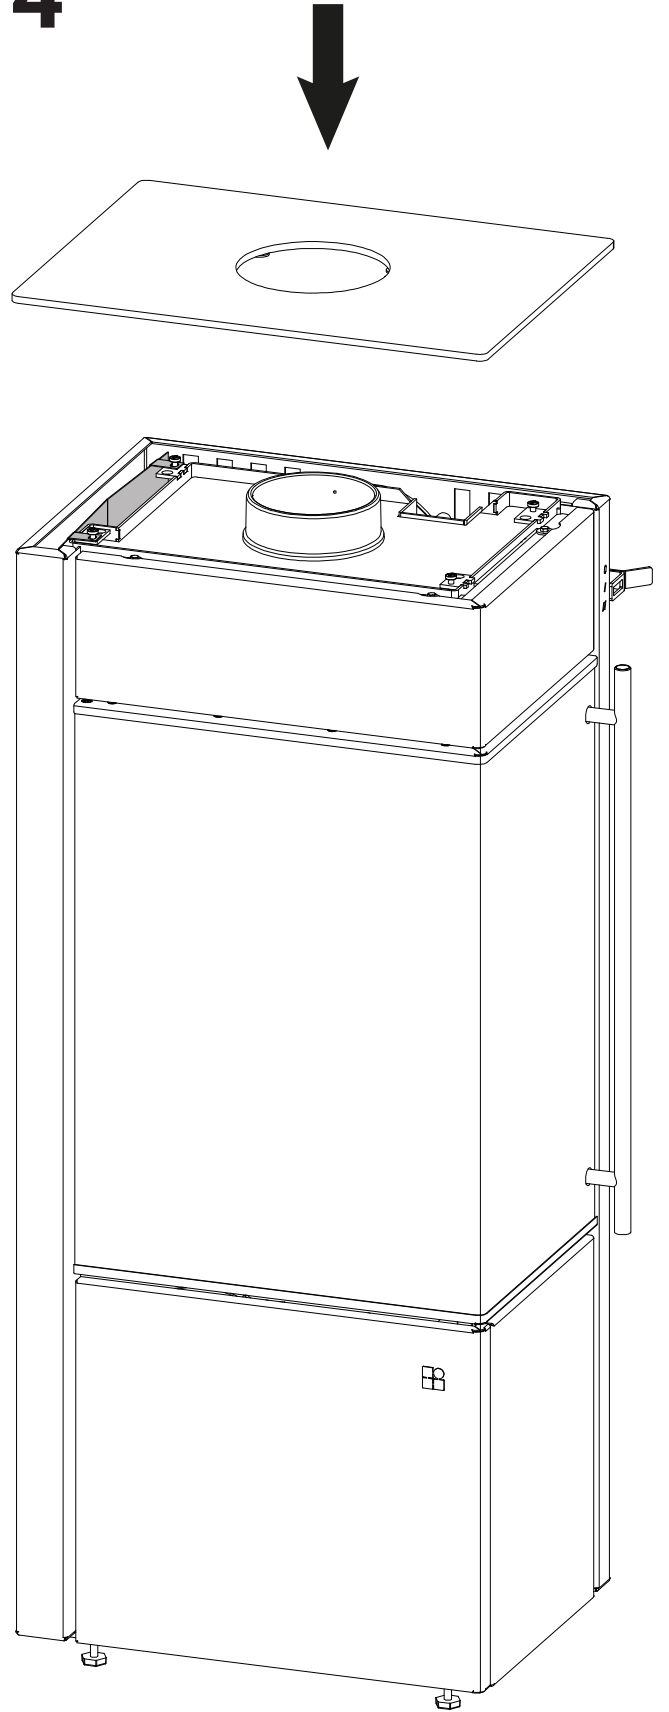

Ohne das Strahlenschutzblech besteht Brandgefahr!

Auch mit Strahlenschutzblech werden die Oberflächen im Holzregal ca. 80°C heiß! Vorsicht beim Berühren heißer Oberflächen!
